5a. Doc. Number	84K00200	6. Doc. Name	System Level Specification (SLS)	
5a. Doc. Revision	Pre-Release 1			
6. Name of RID Team		SLS RID Review Team		
7. Problem				
<p><u>Paragraph 2.2.9 System Control Requirements:</u> This paragraph and subparagraphs group system level control tasks that will result in definable system level CSCI's, hardware interfaces, signal interfaces and software interfaces. It is difficult to understand where one ends and the other begins.</p>				
8. Recommendation				
<p>Provide an illustration defining the RTPS hardware and software interfaces. Provide references to Interface Control Documents (ICD) that will be generated to control these interfaces, and to CSCI's that provide detail requirements.</p>				
9. Impact if recommendation not implemented				
<p>Clarify the CLCS requirements.</p>

Response Attachment 200-114

The recommended action to this RID would be to provide a top level design of System Control in this section of the document. This information will be provided in the System Design Document, now available on the Web for review and comment. It is the position of the RID Management Team that providing the top level design of System Control in the SLS is probably not in the best interests of the CLCS program. The RID is therefore rejected.
